

Romer Necesario

Senior Full Stack Developer

blast.romer@gmail.com +63 915 263 3870 Bacolod City, Philippines github.com/blastromer

Full stack web engineer with 12 years of PHP experience, 9 years in Laravel, 7 years working with Webflow, WordPress, and Wix, and 3 years in Golang. Strong background in scalable e-commerce systems, API integrations, microservices, reporting tools, and high-volume backend workflows using Laravel, Symfony, Yii, Node.js, MySQL, MongoDB, Vue.js, React.js, and Next.js.

EXPERIENCE

Senior & Full Stack Developer

Apr 2023 - Present

G. O. Green Enterprises, Inc

- Lead third-party API integrations for Amazon, eBay, and Houzz from design through deployment.
- Build Laravel backend systems with queues, caching, Eloquent ORM, and automation for large inventory feeds.
- Create reporting and system health tools while maintaining MySQL and MongoDB data reliability.
- Collaborate on Vue.js and React.js frontends for responsive e-commerce experiences.
- Contribute to service-oriented and API-driven architectures for scalable commerce workflows.

Senior Full Stack Developer

Present

DevDen / GO Green Enterprise Inc

- Contribute to modern web applications and backend integrations for production business systems.
- Support full-stack delivery across API, data, and frontend implementation work.
- Build and support projects using modern frontend frameworks and maintainable backend services.

Full Stack Web Developer

Apr 2012 - Mar 2023

Codedaddy.ph

- Grew from junior to senior developer while building frontend interfaces with HTML, CSS, Bootstrap, JavaScript, jQuery, and AJAX.
- Developed scalable Laravel applications and led REST API integrations with Amazon, eBay, and Houzz.
- Delivered end-to-end solutions using Laravel, Yii, Vue.js, React.js, Next.js, and MySQL.
- Built and maintained websites and landing pages in WordPress, Webflow, and Wix for around 7 years.
- Worked on Pacific Prep WMS, a multi-tenant warehouse management system using Yii for the backend and React for the frontend.

Junior Software Developer

May 2011 - Jun 2012

Llevante Outsourcing

- Worked with PHP, Joomla, and VB/C#.NET on content management, custom applications, and integrations.

LANGUAGES

English, Filipino

SELECTED PROJECTS

PlumbersStock

Large-scale e-commerce platform with backend integrations, inventory synchronization, and automation workflows.

PlumbersStock PH

Localized commerce implementation supporting catalog, sales, and operational workflows.

POS System

Modern point-of-sale application with inventory, reporting, and multi-user workflows.

Microservices Commerce Platform

Built API-driven commerce features using Symfony for backend microservices and Next.js for the frontend experience.

Pacific Prep WMS Multi-Tenant

Built and supported a multi-tenant warehouse management system for Pacific Prep using Yii as the backend framework and React for the frontend. Worked on tenant-aware workflows, inventory operations, order processing, and maintainable admin tools for daily warehouse activities.
